SOUTHERN UTILITY RESOURCES

Education

➤ Southern Utility Resources mission is to provide a menu of services regarding public water/sewer and natural gas systems owned by small cities and public districts at no cost. The goal is to aid those governmental entities through education and training of both managers and operators of utility systems, thereby making the utility system more cost efficient in both day by day operations and long-term capital investments.

➤ Southern Utility Resources will reach the educational mission by attending conferences, having vendor booths to disseminate marketing materials, coordinating with state agencies (Department of Health – water) (Department of Environmental Quality – sewer) to identify smaller cities and districts which may need assistance and attending regional workshops for smaller cities at no cost.

➤ Presentations to general public users of municipal utility services, individual cities, and districts when identified at no cost.

➤ Conference Attendance/Marketing Booths

- ✓ Statewide Municipal Association Conferences
- ✓ Statewide County Association Conferences
- ✓ Statewide Public Utility Association Conferences
- ✓ Small City Work Shops
- ✓ Utility District Meetings

SOUTHERN UTILITY RESOURCES

Operational Efficiency Services

Working with Southern Utility Resources Staff and governmental qualified engineering professionals, Southern Utility Resources will undertake a system review and make recommendations to: improve safe water quality; environmentally sound wastewater collection and treatment; and safe and reliable natural gas service to the public.

- ✓ Review
- ✓ Analyze
- ✓ Report
- ✓ Implement

Focus on smaller government owned (city) water/sewer and natural gas operation/infrastructure.

Focus is to operate systems to maximize efficiency to improve service to water/sewer customers and reduce/maintain costs.

Goal of services is to improve operations through analysis of manpower; system design; system operation.

Southern Utility Resources service costs are free or only expenses depending on City's financial ability.

SOUTHERN UTILITY RESOURCES

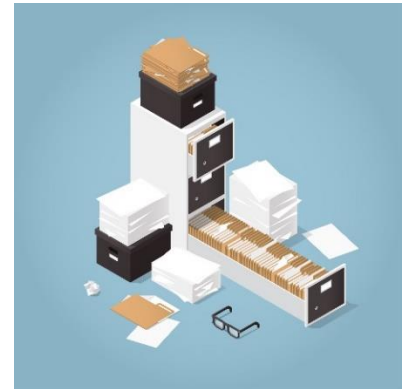

Financial And Financial Consulting

- Southern Utility Resources provides financial services through water/sewer and natural gas system rates reviews to governmental entities. Provides guidance regarding low cost capital project funding, via grants and subsidized financing.
- Through lower cost funding for utility projects, Southern Utility Resources is assisting in maintaining or lowering utility rates to system users, thus reducing rate payer cost.
- Many smaller and medium size governmental entities lack the expertise to understand and undertake the most cost-effective funding for utility projects.

Ownership & Management Services **Small to Medium Water/Sewer And Natural Gas Systems**

- Southern Utility Resources will undertake ownership of Public/Private Utility systems to relieve the burden to governmental entities.
- Through ownership and operation of water/sewer and gas systems, the cost to local governments (Cities/Counties/Districts) will be eliminated. The direct cost of personnel, management responsibilities and service liability will be eliminated.
